🪖 Military Service: Completed

PROFESSIONAL SUMMARY

Technical Office Engineer with solid experience in **road and infrastructure projects**, including urban highways, industrial roads, road maintenance works, and public parking facilities. Strong background in **quantity take-offs, BOQs preparation, shop drawings review, cost estimation, and technical coordination** with consultants and governmental authorities. Proven ability to support large-scale infrastructure projects in compliance with approved drawings, specifications, and applicable codes. Seeking a challenging opportunity in the **Gulf region** to contribute technical expertise and documentation excellence to a reputable organization.

PROFESSIONAL EXPERIENCE

Technical Office Engineer

Fawzy Al-Refaey General Contracting & Roads Construction

📍 Egypt | **02/2023 – Present**

Worked as a **Technical Office Engineer** on multiple road and infrastructure projects executed by the same contractor at different locations across Egypt, under the supervision of various governmental authorities.

Key Responsibilities:

- Preparation and review of **BOQs**, detailed **quantity take-offs**, and **cost estimates**.
- Review of **shop drawings**, road cross-sections, profiles, and pavement structures.
- Review of technical specifications and method statements.
- Preparation of **as-built drawings** and final quantity statements.
- Preparation of technical reports, progress documentation, and official correspondences.
- Technical coordination with consultants and governmental authorities.
- Supporting project management through accurate technical and cost reporting.
- Ensuring full compliance with approved drawings, specifications, and Egyptian codes.

PROJECT EXPERIENCE

Mahmoudia Axis Development Project – Alexandria

🗓️ **02/2023 – 06/2024**

Urban Highway Development Project – Supervised by Engineering Authority of the Egyptian Armed Forces

- Performed technical office works for a major urban traffic corridor.
- Prepared BOQs, quantity take-offs, and shop drawings for road works.
- Reviewed road alignments, levels, profiles, and pavement layers.
- Prepared technical reports and coordinated technical solutions with consultants.

Western Arc Development Project (Major General Omar Suleiman Axis)

🗓️ **06/2024 – 09/2025**

Primary Road & Infrastructure Development – Supervised by Central Coast Reconstruction Authority

- Prepared detailed quantities and **cost estimates** for road construction activities.
- Reviewed drawings, specifications, and construction methodologies.
- Assisted in resolving technical issues related to road geometry and pavement structure.
- Prepared progress-related technical documentation.

Industrial Roads Projects – Borg El Arab City

🗓️ **09/2025 – Present**

Supervised by Borg El Arab New City Authority

- Prepared BOQs and tender documents for industrial road networks.
- Reviewed shop drawings and ensured compliance with road standards.
- Prepared as-built drawings and final quantity statements.

Road Maintenance & Public Parking Garages Projects – Borg El Arab City

🗓️ **09/2025 – Present**

Supervised by Borg El Arab New City Authority

- Prepared technical studies and quantities for road maintenance works.
- Participated in the **design and construction of public parking garages**, including layouts and traffic circulation.
- Reviewed quantities, cost estimates, and execution methodologies.

MILITARY SERVICE

Technical Office Engineer (Conscription)
